DETAILED ACTION

1. Applicant's response filed 11/11/2004 is acknowledged. The addition of new claims 32-34 and amendment of claims 1, 2, 12, 15, 16-18 and 30-31 is acknowledged. Claims 1-34 are pending.

2. Applicant's election of invention Group I, claims 1-18 and 27-31 is acknowledged. Applicant's election of SEQ ID NO: 4 is also acknowledged. Claims 19-26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **with** traverse. Applicant argues that SEQ ID NO: 4 is a member of a genus related in chemical structure and function, and thus not patentably distinct. As such, the election of SEQ ID NO: 4 will be treated as a species election such that SEQ ID NO: 4 is a member of a genus comprising obvious variants of the formula defined by claim 1.

Double Patenting

Claims 1-18 and 27-34 of this application conflict with claims 2 and 4 of Application No. 10/356,257. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Slabas *et al.* (US 5,843,739). A search of the prior art produced 1,761,053 molecules encompassing the generic formula or claim 1, 251,389 molecules encompassing the generic formula or claim 15, 134,568 molecules encompassing the generic formula or claim 16 and 2424 molecules encompassing the generic formula or claim 17. Slabas *et al.* teach one such molecule that comprises the generic sequence defined in claims 1, 2, 15-17. SEQ ID NO: 7 of Slabas *et al.* comprises the sequence Leu-Ala-Val-Val-Leu-Ser-Trp-Ala-Cys-Leu-Leu which fits the generic formula of the claims 1, 2, 15-17. This sequence would inherently possess the ability to bind FVII as taught by the present claims. Thus, the reference clearly anticipates the invention as recited in the claims.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-18 and 27-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Slabas *et al.* (US 5,843,739). A search of the prior art produced 1,761,053 molecules

Art Unit: 1653

encompassing the generic formula or claim 1, 251,389 molecules encompassing the generic formula or claim 15, 134,568 molecules encompassing the generic formula or claim 16 and 2424 molecules encompassing the generic formula or claim 17. Slabas *et al.* teach one such molecule that comprises the generic sequence defined in claims 1, 2, 15-17. SEQ ID NO: 7 of Slabas *et al.* comprises the sequence Leu-Ala-Val-Val-Leu-Ser-Trp-Ala-Cys-Leu-Leu which fits the generic formula of the claims 1, 2, 15-17. The remainder of the claims are directed to obvious variants of SEQ ID NO: 7 taught by Slabas *et al.* Thus, the claimed invention was within the ordinary skill in the art to make and use at the time it was made and was as a whole, *prima facie* obvious.
